# So, you want to recycle?

We're so glad to hear you say that! Recycling is important for so many reasons. In addition to keeping trash out of our growing landfills, recycling reduces our need for new raw materials, conserves energy, reduces pollution, and even produces jobs!

Community Waste Disposal offers several recycling options. Read on to determine what service will be right for you!

## Single Basket Recycling

Let Community Waste Disposal do the work for you! With Single Basket Recycling, all recyclables go into one basket at each desk. Approved recyclables include paper of all types and colors, rinsed aluminum and steel cans, plastic beverage bottles, rinsed/unbroken glass bottles and jars, in addition to cardboard, file folders, cereal/dry food boxes, clean empty pizza boxes, and paper beverage cartons.

Recyclable materials are placed into a desk-side receptacle. At night, the janitorial staff will collect the materials and dump the items into the recycling compactor.

PLEASE NO aerosol cans, aluminum foil, coat hangers, cookware, cups, dishes, glasses, lightbulbs, window glass, packing peanuts, plastic bags, and Styrofoam.

## Cardboard Recycling

Community Waste Disposal provides corrugated cardboard recycling in 8-cubic yard slotted containers. The slot discourages trash from being placed in the container and encourages workers to flatten boxes. Flattening boxes increases the volume of material the container will hold.

## Apartment Recycling

Taking up as little as one (1) standard parking space, residents can simply combine all their recyclables in one (1) eight-yard container. Service may be on a fixed schedule or on an as-needed basis.

A CWD Sales Representative will schedule extra pickups, swaps for damaged containers, and more. For pricing or an increase or decrease in service, please contact your CWD Sales Representative directly.

Do Not Include: Food Waste, Plastic Bags, Plastic Wrap, Foam Cups and Containers
