

PLEASE RECYCLE.
DO IT FOR YOUR COMMUNITY.
DO IT FOR YOU.

Community Waste Disposal makes it easy for your community members to recycle by making your events **GREEN!** The more products sent to a recycling facility means **LESS WASTE** sent to our local landfills!

During a **GREEN** event, CWD employees will be available to deliver, set up and maintain Recycling Depots. In addition, trash carts are available and placed next to the depots, with the intention of keeping your event **CLEAN.**

Making your community **AWARE** of your dedication to the environment by hosting a **GREEN** event not only promotes recycling, but also creates a sense of accomplishment among participants.

why recycle?

Americans use 2.5 million plastic bottles every hour. Most of them are thrown away. In a landfill, a plastic bottle can take thousands of years to decompose.

mrpolymers.com

Recycling, re-using, and composting creates 6-10 times as many jobs as landfills and incinerators.

factretriever.com

PET plastic (#1) is the most widely recycled plastic in the world! Some of your clothing, toys, and stuffed animals may have been recycled from PET plastic.

mrpolymers.com

Recycle your aluminum cans! It takes only about two months for recycled aluminum to be put back on store shelves. On the contrary, if you put the can in the trash, it will stay in that form for 500 years or more!

In conjunction with trash carts, CWD will provide Recycling Depots in which residents can deposit recyclable cans and bottles during your community event.

From golf tournaments to community cook-offs, don't forget to make your next event a **GREEN Event.**

The Town of Little Elm has a long history of recycling at our community events. This is one of our greatest opportunities to teach the public how easily recycling can be done at home and at play. The Town...recognizes that recycling...makes a positive impact on the environment.

Doug Peach
Deputy Town Manager
Town of Little Elm

The City of Keller hosts at least 12 major community events per year and works with CWD to provide recycling options at all of them. Not only does this reduce the environmental footprint of each event, it also helps keep our public spaces, particularly our award-winning parks, clean and relatively undisturbed even after large festivals and concerts.

Sarah Hensley *Community Development, City of Keller*

Green Events are an opportunity to educate residents and visitors about basic, voluntary, sustainable efforts they can do to positively impact the environment. We practice place-based education, which fits perfectly with Green Event efforts since everything begins where you live, work and play.
